

Question 1: Do the completed Past Performance Questionnaires count against the five (5) page count for Section II?

Response: The Past Performance Questionnaires will not count against the five (5) page count for Section II.

Question 2: The RFP Section M, paragraph M.2 / A.3, indicates the Offeror's BOEs should be included within section A.3. Is the Government expecting to see (within section A.3) each specific BOE, by WBS, that collectively contribute to the Offeror's price? Or, is this section to contain only text describing the Offeror's methodology for BOE justification? If the former, these BOEs can be quite extensive if provided to sufficient detail, and exceed the 15 page limit for the entire Section I – they may be more properly placed in Section III (Price). Please clarify.

Response: It is correct that the Offeror's BOEs should be included within section A.3. Please review Section L.8./A.3. The Government is asking for a narrative description of your BOE. The Government is expecting the BOE to be brief and concise. The page limit for Section II, Technical Approach, was previously increased to 20 pages via Amendment 1.

Question 3: Similar question as above, the RFP Section L, paragraph L.8 / A.3, indicates the Offeror's Labor Classifications should be included within section A.3. Is the Government expecting to see (within section A.3) each specific Labor Classification to be utilized in the study? This can be extensive if provided to the level of detail requested. Please clarify, as this may be more appropriately supplied in Section III (Price).

Response: Yes, the Government is expecting to see a list of each labor category with a very brief description of that labor category, along with corresponding hours. The page limit for Section II, Technical Approach, was previously increased to 20 pages via Amendment 1. Please keep in mind that this proposal is for doing the study only.
